Zadania

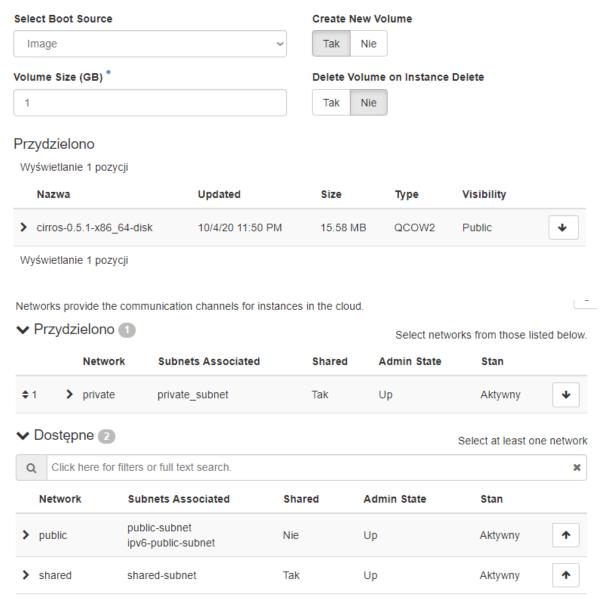

1. Utwórz kilka instancji maszyn wirtualnych i sprawdź, czy maszyny mogą się ze sobą komunikować.

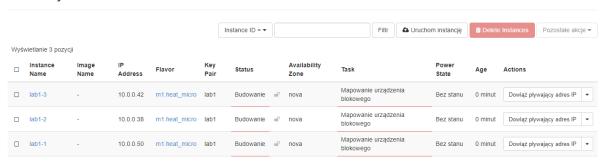

Instance source is the template used to create an instance. You can use an image, a snapshot of an instance (image snapshot), a volume or a volume snapshot (if enabled). You can also choose to use persistent storage by creating a new volume.

Instancje

```
login as 'cirros' user. default password: 'gocubsgo'. use 'sudo' for root.

2. Zaloguj się do jednej z maszyn za pomocą polaczenia publicznego i utwórz w tej maszynie plik tekstowy ip.txt z aktualnym adresem ip pierwszego interfejsu sieciowego
